

Introduction to Integrative Hospice and Palliative Care

March 7-9, 2025

Date and Time	Topic	Description	Location
Friday, March 7 8:00-8:30	Breakfast		Breakfast Nook
8:30-9:00	Opening and Welcome		Classroom
9:00-10:00	Philosophy of Hospice and Palliative Care	This lecture will be an introduction to the concepts of Hospice and Palliative Care. Topics will include definitions and history of human and veterinary hospice. We will also cover the Hospice and Palliative Care team concept, and applications in veterinary medicine.	Classroom
10:00-10:30	Break		
10:30-12:30	The Forgotten Patient-Communication in a hospice setting, Intake Exam, Setting a Plan, Guidance for the Caregiver	In this lecture, we will discuss the initial palliative care intake and discussions with owners; including their expectations, goals, and understanding of their pet's situation. We will also compare in-hospital vs. in-home exams and how Palliative Care/Hospice differs from other types of practice. Topics such as care-giver burden, burnout, the essential nature of self-care, and anticipatory grief will be covered as well.	Classroom
12:30-2:00	Lunch		
2:00-3:30	Quality of Life Assessments, Emergency Care, Crisis Kits, the Dying process	We will discuss the use and limitations of official QOL scales and teaching the owner to do serial QOL assessments in this lecture. We will also discuss ways to manage an emergency at home using crisis kits and comfort measures. Finally, we will discuss the stages of dying.	Classroom
3:30-4:00	Break		
4:00-5:00	End of Life Discussions	Here, we will discuss euthanasia, CAETA, 10 steps for a good death, and the multistep protocol. We will also discuss aftercare of the body. Lastly, we will examine discussions with families about end of life goals, including in home vs. in-clinic euthanasia.	Classroom
Saturday, March 8 8:00-8:30	Breakfast		Breakfast Nook
8:30-10:30	Overview of Treatment Options	This lecture will be a general introduction to commonly used modalities in Integrative Hospice, with a general introduction of basic concepts and options. Topics will include	Classroom
